1. Claims 186-192, 194-209, and 211-215 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 3, 4, 6, 8-11, 13-17, and 24-95 of copending Application No. 09/ 018783.

Although the conflicting claims are not identical, they are not patentably distinct from each other because both the present claims and the claims of the '783 application recite a process which includes electrodepositing copper onto a surface of a microelectronic component and annealing in order to reduce resistivity of the copper. With respect to the two power level limitation of instant claim 186, note for instance claim 64 of the '793 application. With respect to the pulsed waveform of a specific frequency as recited in instant claim 200, note for instance claim 66 of the '783 application. While no claim of the present application appears to be identical to any claim of the '793 application, both sets of claims are drawn to a specific series of process steps which are performed in the same order for the same purpose and preferably under the same set of conditions in both instances. Consequently, no patentable distinction is seen between the process as defined in the instant claims and that defined by the '793 claims.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 36, 37, 40, 71, 73, 75, and 117-182 are allowable over the prior art of record. Claims 193 and 210 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
